

Dear Governor McDonnell & Administrator Jackson

NOV 09 2010

Clean water is good for the economy. It is crucial for our tourism and recreation industries as well as our historic oyster and crab fisheries. We rely on it for drinking water and expect a level of safety in our rivers and streams.

As you work towards finalizing, implementing and enforcing Virginia's Watershed Implementation Plan, I urge you to create real pollution reductions from treatment plants along the lower James River; implement specific mandates and incentives to reduce pollution from farms and cities; and make sure we have specific two-year benchmarks to track and measure our success.

If we don't do our job in Virginia, Administrator Jackson, I urge you to step in and protect our rivers, streams and the Bay.

Sincerely,

(name)

Jamaar Johnson
